Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-22 and 32-46 are, drawn to an amusement article, classified in class 119, subclass 709.
- II. Claims 23-31 are, drawn to a process for imparting microbe-inhibiting properties, classified in class 119, subclass 174.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process can be used to apply a microbe-inhibiting agent to other types of toys.

IF GROUP I IS ELECTED THEN THE FOLLOWING ELECTION OF SPECIES APPLIES.

This application contains claims directed to the following patentably distinct species of the claimed invention: Invention I as disclosed in claims 19-22, Invention II as disclosed in claims 32-39, Invention III as disclosed in claims 40-44 and Invention IV as disclosed in claims 45 and 46.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims that are generic.

Art Unit: 3643

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
